

VDL PACKAGING

UVA DYNAMIC PURE PRODUCT SAFETY AND CREATIVE PACKAGING

VDL Packaging creates and develops innovative packaging solutions for the fresh and frozen market. Tailor-made or off-the-rack, we are able to produce unique bags that are sustainable, efficient and innovative.

Are you looking for a high hygienic standard, but is wash-down machinery not necessary? Do you want the flexibility to change the bag styles when market trends change, but still at an affordable price per bag? Then VDL Packaging's UVA Dynamic Pure is what you're looking for!

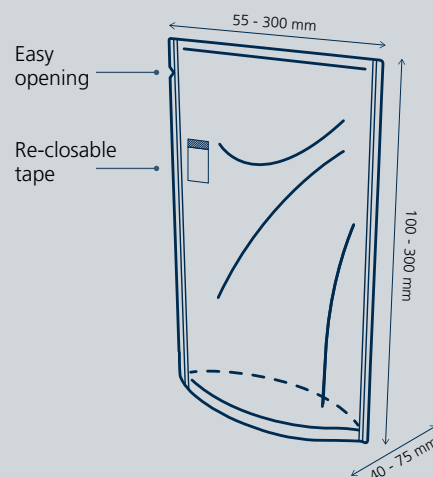

UNIQUE SELLING POINTS

- › IP55 bag maker to withstand hose cycles with extra care
- › Complete stainless steel design with sloped surfaces
- › Electro cabinet with hygienic covers and waterproof rubbers
- › Hygienic motors and feet, engraved rulers and removable film web rollers
- › Fast, easy and tool-less format changeovers
- › Combi seal system, for heat seal and ceramic seal
- › Modular design for multiple expandability in bag options
- › Ceramic seal for significant film reduction
- › PackML integration

UVA Dynamic Pure is hygienically designed with a complete stainless steel sloped frame, waterproof rubber seals and hygienic ventilation covers. This makes it possible to clean the machine efficiently, for a low contamination risk and to prevent bacterial growth.

As consumer trends change, the UVA Dynamic Pure can too. This machine is built in a modular way, which enables you to choose options to make the machine as flexible as you prefer. The result: endless possibilities to create the packaging of the future.

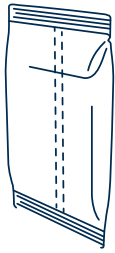

BAG OPTIONS

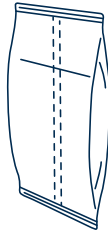

- › Multiple bag styles and sizes on one machine
- › Premium symmetric and asymmetric four corner seals bags
- › Transverse zipper applicator
- › Flat bottom assembly
- › Chain bag
- › Hole punch / euroslot

PACKAGING RANGE

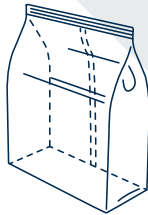

The UVA Dynamic Pure can offer a variety of packaging solutions, according to your specific needs.

UVA DYNAMIC RANGE

The UVA Dynamic range consist of various models, which are all immensely flexible bag makers, as they offer the ability to make continuous variations when market trends change. The models in this range have a different IP rating. From Dynamic Pure in IP55 to the ultimate wash down machine with the Dynamic Hydro, which is a true IP66 bag maker.

SPECIFICATIONS

UVA Dynamic Pure

Technology	Continuous Motion
Frame	Closed, stainless steel frame
Jaw width (mm)	320 / 400
Machine dimensions (w/d/h in mm)	1,500 / 3,256 / 1,655
Machine weight (approx.)	840 kg
Power supply	10 / 12.5 kVA
Control system	Allen Bradley 5500 CompactLogix 12-inch HMI touch panel
PackML integration	Yes
Max. seal pressure	6 kN
Compressed air requirement	6 bar
Mechanical bag output	150 bags per minute
Max. film roll diameter (mm)	550
Max film width (mm)	850
Min. bag size (w/d/h in mm)	50 x 30 x 60
Max. bag size (w/d/h in mm)	400 x 150 x 600
IP standard	IP55*
Sealing methods	Heat Seal optional ceramic seal

*The UVA Dynamic Pure is IP55, this excludes third party equipment and peripherals

CUSTOMISED SOLUTIONS

In addition to UVA Dynamic Pure, we offer customised solutions that exactly fit your needs and give you an advantage in the market. We empower your brand with specific solutions that support you to become bigger, better, bolder and more exciting. And therefore, create more impact with your packaging in the fresh food segment.

Our in-house engineering and production combine forces to develop smart and simple solutions to create the future of packaging.
